

About the Handling of Personal Data

Having been assigned by Agency for Natural Resources and Energy, Mitsubishi Research Institute, Inc. is the project management office for "Project of Decommissioning, Contaminated Water and Treated Water Management".

Those who wish to apply for providing information (RFI: Request for Information) related to the research and development contents to be conducted under the project need to read and consent to this "About the Handling of Personal Data" before providing information.

【About the Handling of Personal Data】

- (1) Any personal data supplied to the management office will be used only for the administration of this RFI.
- (2) Any personal data supplied to the management office will be handled carefully with adequate security measures.
- (3) The project management office may outsource the works including the handling of personal data supplied to the subcontractor who made the agreement with us about the protection of personal data.
- (4) Regarding personal data supplied, the following information may be transferred to Agency for Natural Resources and Energy, Nuclear Safety Technology Center (the subsidy fund operating organization), Nuclear Damage Compensation and Decommissioning Facilitation Corporation who is a concerned body of this project.
 - Information to be transferred: company name of the applicant (the representative's job title and department), the name of representative and contact information (phone, e-mail addresses, etc.)
 - How to transfer: electronically or in print.
- (5) Any personal data supplied to and kept by the project management office will be responsibly disposed of after the completion of assigned term.
